

# TAS 1000

True Air Data Computer System

Advantage Series #2

FAA Approved  
TSO'd and STC'd

Wind Direction  
Lit Pointer  
Wind Speed  
Inner Graph  
Wind Component  
Blinking LED  
Drift Angle  
Inner Bar

TAS 1000 also displays a wind direction arrow on many of the new GPS systems with a moving map page.

## Air Data Computer

- Barometric Setting
- Total Air Temperature
- Static Air Temperature
- ISA Temperature
- Density Altitude
- Density Altitude Difference
- Pressure Altitude
- Rate of Change of Altitude
- Climb Gradient
- Indicated Air Speed
- True Air Speed
- Ground Speed
- MACH Number
- Battery Voltage
- Altitude Alerts
- Overspeed Warning

## Fuel Computer

- Total Fuel Flow
- Left Fuel Flow
- Right Fuel Flow
- Fuel Flow Left/Right
- Left Fuel Used
- Right Fuel Used
- Total Fuel Used
- Total Fuel Remaining
- Engine Fuel Efficiency

## Wind Computer

- Wind Direction
- Lit Pointer
- Wind Speed
- Inner Graph
- Wind Component
- Blinking LED
- Drift Angle
- Inner Bar

Detect **wind shear** with aviation's first new instrument called the **Windicator**, an integral part of the TAS 1000 system.

**Windicator** presents a previously unavailable graphical display of the winds aloft in real-time.

The **Windicator** information alone makes the TAS 1000 installation worthwhile.

**TAS 1000** is designed to give pilots a simple and efficient way of reading air data, fuel and wind information directly from your GPS pages.
